- **Register and Verify your signature:** Write/draw your signature using a mouse, graphics tablet and/or your finger on screen. You may use your name signature or any other password/phrase or even a drawing.

We recommend that you practice a few times before proceeding (use “**Clear Image**” button to erase any practice tries).

When satisfied with your signature, then click “**Done**” button. You will be required to write the matching signature before completing the registration.

- Open any PDF file by selecting from menu: **File > Open**. Select **Signature > Sign Box** from the Menu or click the “**Sign Box**” button to see the Box, and then drag the Box to the location where you wish to sign. After the Box placement, press the “**Sign**” button to start signing. Make sure to save the file after signing.

- If you wish to add any annotations or notes (such as a date), then select the Sign Box location where you wish to annotate. Click **“Save Image with No Verification”** button to save the annotation without signature verification:

- You may view the signed document using any PDF viewer:
