

## DynaSig® Software Installation Guide

### Software Installation Summary:

- If you have a software installation CD: insert the CD – it should Auto-Run, then follow the instructions.
- If you downloaded a compressed file (.zip): extract the installation files (save to any hard drive location first) and double-click the **Setup.exe**, then follow the Installation Wizard.

### System Requirements:

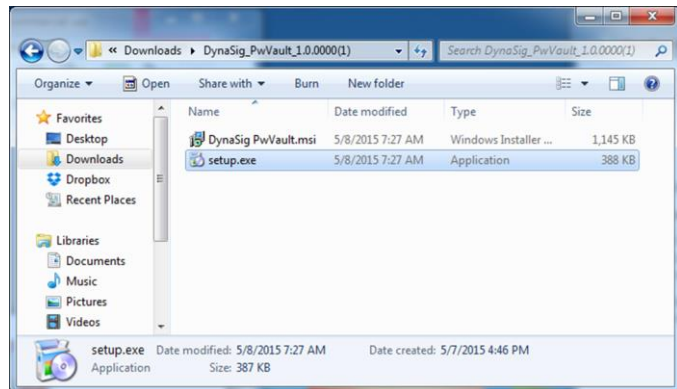

- **Supported Operating Systems:** Microsoft® Windows® XP, Vista, 7 and 8.
- **Required Updates:** Microsoft® .NET Framework version 4.0 or newer.

**Note:** If the software does not install, then exit the installation, update .NET Framework and then retry.

### Detailed Instructions for downloading and Installing Software:

1. Save (to any hard drive location first), then extract the installation files.

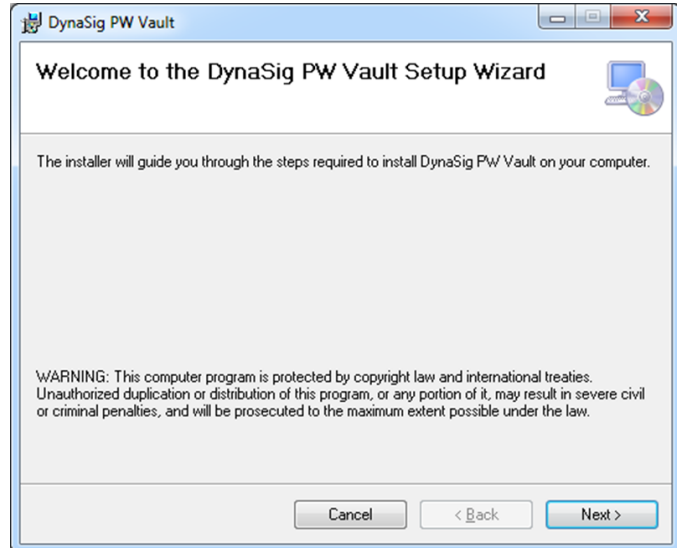

Double-click **Setup.exe** to start the installation program.

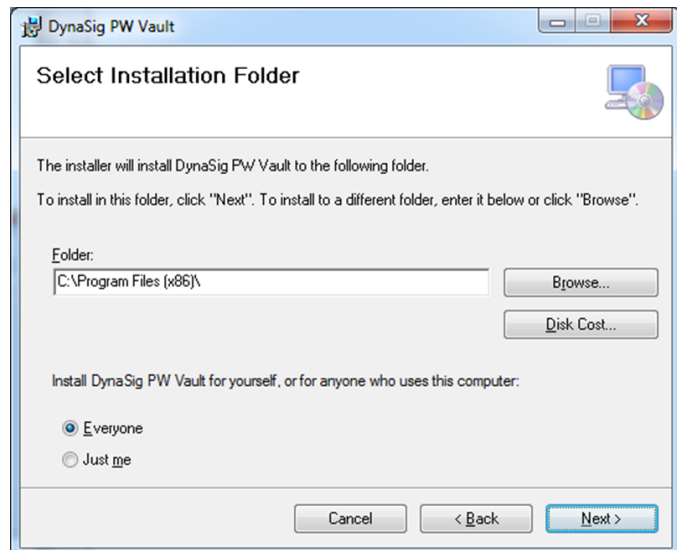

2. If you see any warning messages, ignore or override them.

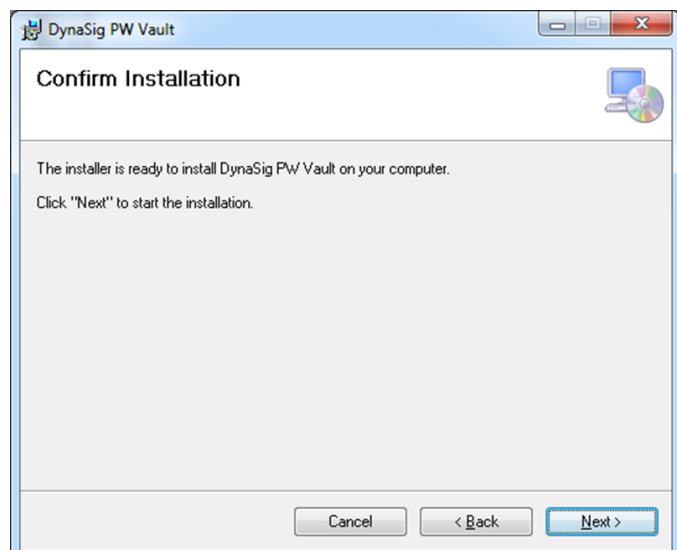

3. When the Setup Wizard opens, click **Next**:

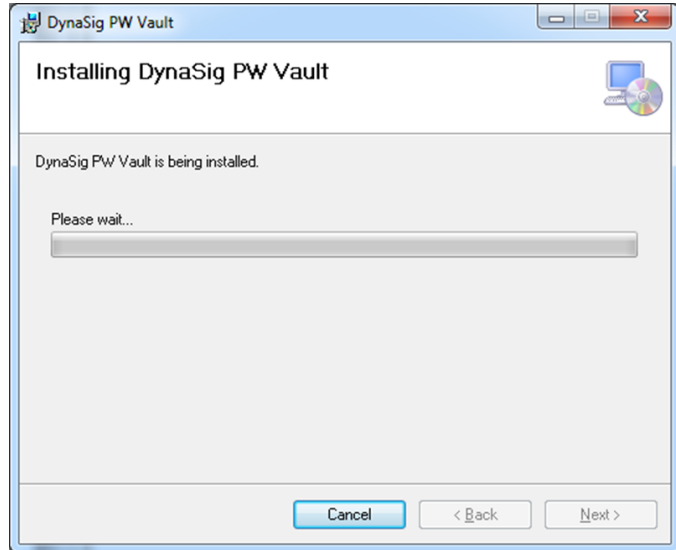

4. Select the Installation Folder and then click **Next**:

5. To Confirm Installation, click **Next**:

6. Wait for the installation to complete:

7. When Installation Complete, click **Close**:
